

Color Match Your Skin

Youngevity® Mineral Makeup Foundation

Shake out a small amount of mineral makeup onto a tissue. Use the Kabuki Brush to apply a light dusting of the Mineral Makeup to your jaw line. You should not be able to tell the difference between your skin and the makeup. If you can, choose another color and repeat the process until you find the perfect match for your skin tone. You may need to mix two foundation colors to achieve the perfect match.

Foundation Ingredients: mica, titanium dioxide, iron oxides. May also contain: ultra marine blue, kaolin, magnesium stearate, rice powder, boron nitrate, magnesium and zinc oxide.
